

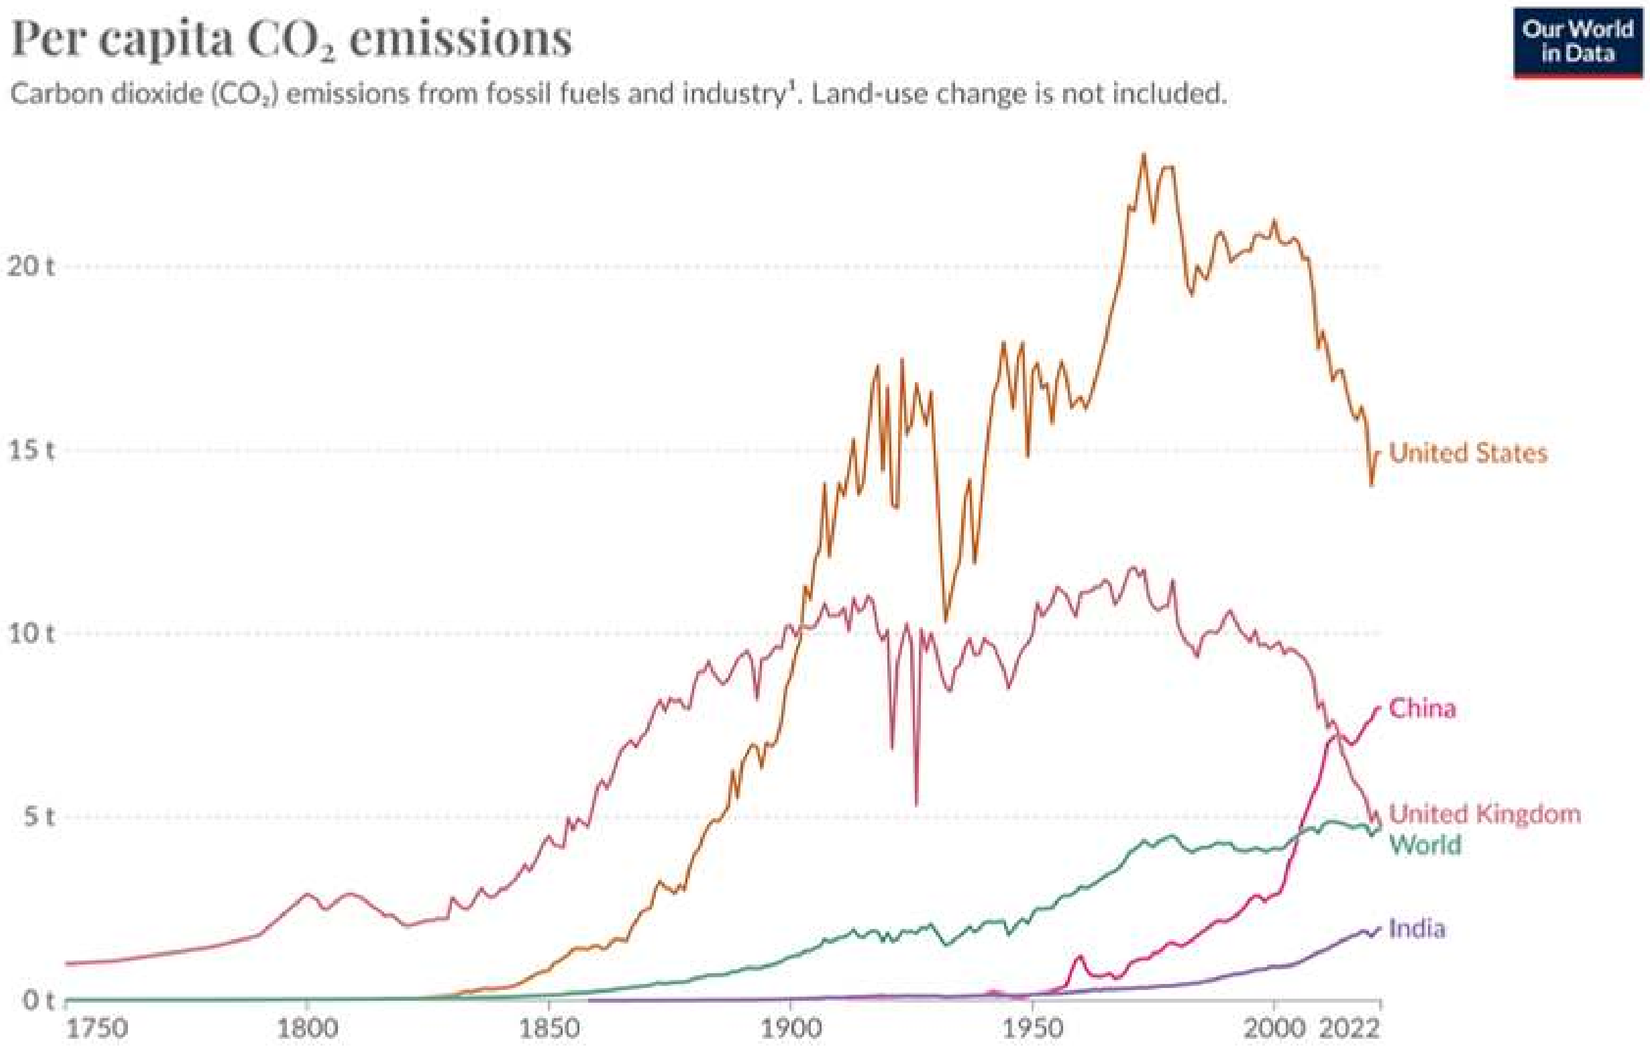
Carbon Clean

A POINT SOURCE CARBON CAPTURE EXPERTS, PROVIDING INDUSTRIES WITH THE NEXT GENREATION SOLUTIONS THEY REQUIRE TO ADAPT TO A NET ZERO WORLD.

INTRODUCTION

Transforming Carbon Emissions

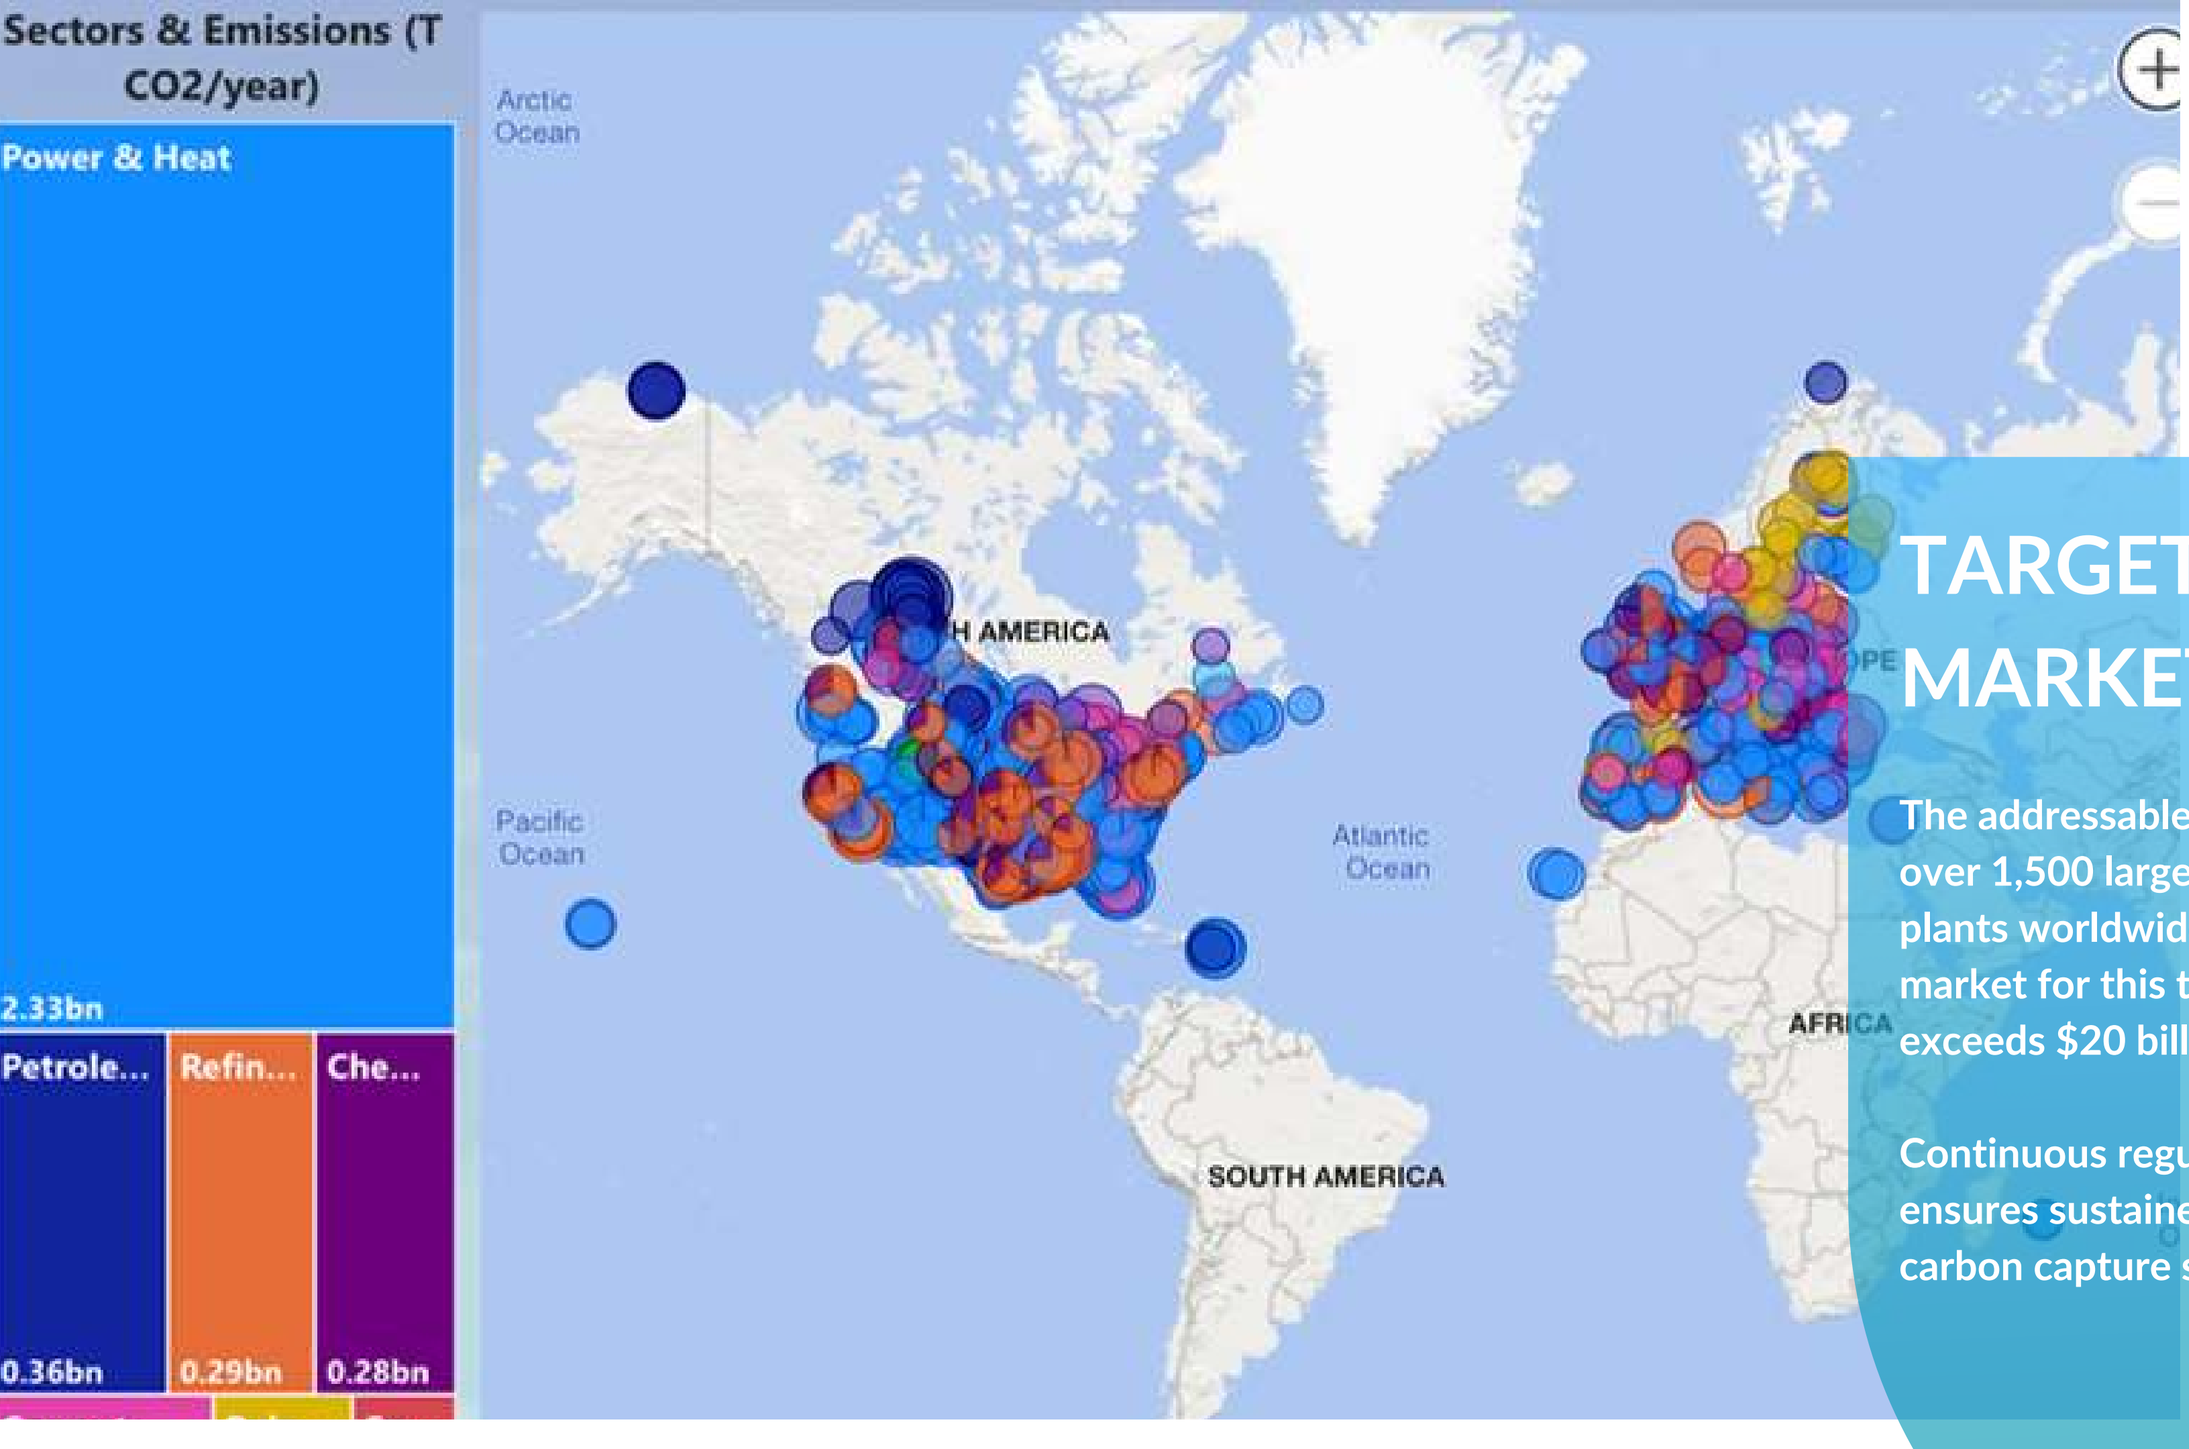
Opportunities



PROBLEM

1. Industries face increasing pressure to reduce carbon emissions to meet regulatory standards and mitigate climate change.

2. Traditional carbon capture methods are often inefficient and costly.



TARGET MARKET

The addressable market includes over 1,500 large-scale industrial plants worldwide, The potential market for this technology exceeds $20 billion.

Continuous regulatory pressure ensures sustained demand for carbon capture solutions.

SOLUTION

Solution 1

Offers advanced, cost-effective carbon capture technology that produces 80% less byproduct.

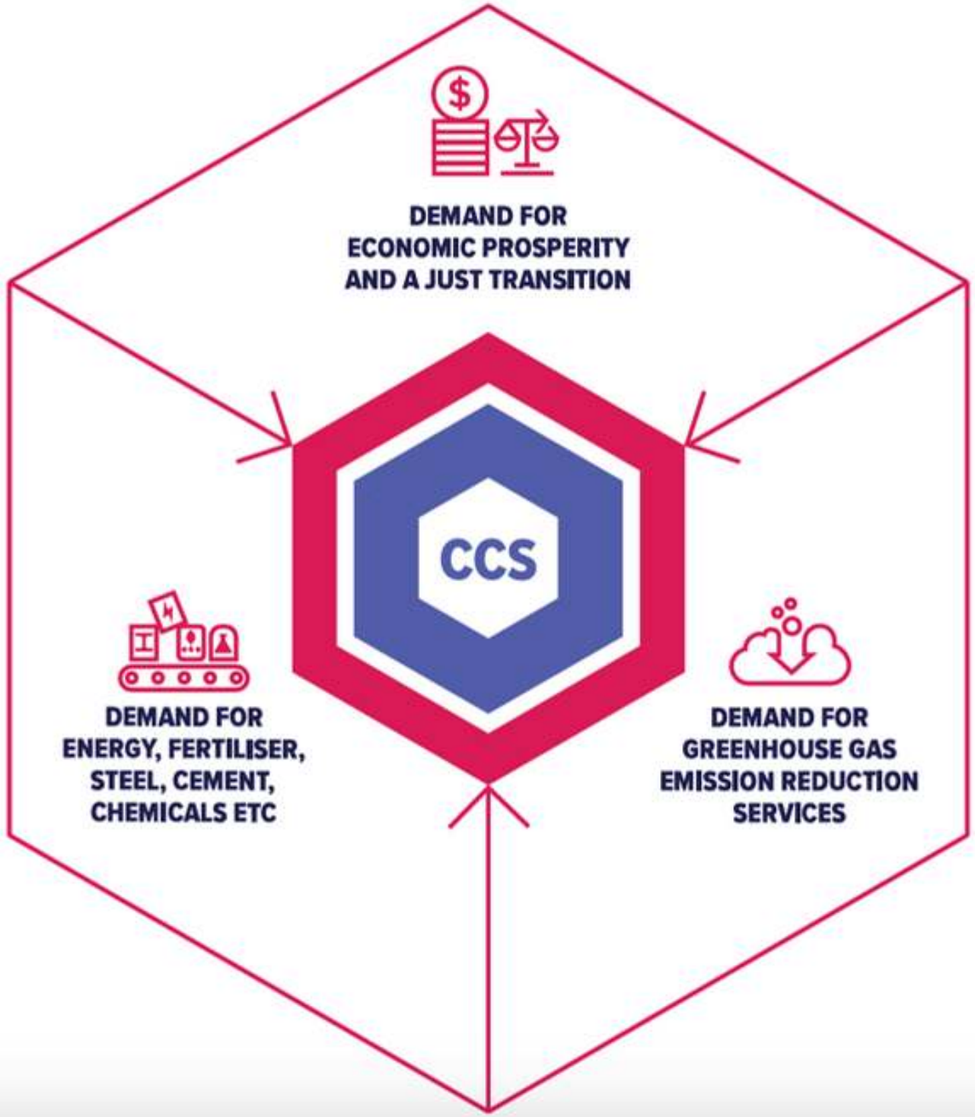
Solution 2

Captures up to 90% of CO2, converts CO2 into valuable products.

CycloneCC Modular Technology

Proprietary Solvents

THE GLOBAL CARBON CAPTURE AND STORAGE MARKET IS PROJECTED TO REACH $6 BILLION BY 2027



Several industries, including oil and gas, chemicals, and cement, are actively seeking solutions to reduce their carbon footprint

BENEFITS OF PARTNERSHIP

Subscription based model:-
Monthly fee for technology use.
Provides consistent, predictable revenue.

Profit Sharing:
Share of profits from CO2 conversion products.
Adds another revenue stream for our partners.

Operational efficiency:-
Enhanced sustainability profile, potentially attracting ESG (Environmental, Social, and Governance) focused investments.

Financial Savings:-
Reduced costs associated with carbon taxes and penalties, which can range from $10 to $50 per ton of CO2.

Thank You
